

1. Select your label type.

Then choose the size and languages you need.

2. Start to build your label.

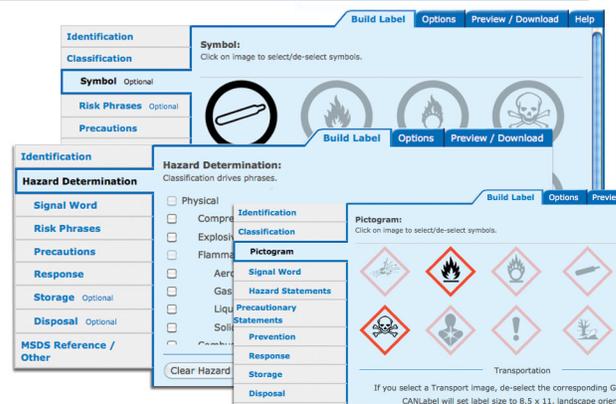

Move down tabs to build label, then across tabs to review & download. Identification: Add product and supplier information.

3. Select the product hazards.

Your choice will generate suggested symbols and phrases in the tab sections below.

Edit various label elements such as symbols, phrases, and the MSDS reference. Add, edit, remove or move phrases.

4. Choose your options.

The Options tab allows you to modify the orientation of the labels, symbols/pictograms and more.

5. Finalize your Label.

The Preview/Download tab allows you to adjust text size and format, and move text between areas.

Finalize your label for future reference. Download and print your label.
