Your Workplace Hazard Action Tool

Build your workplace hazards
action plan with this online tool.

This interactive online tool provides you with practical information and resources to help recognize, assess, and control hazards in your workplace. Checklists guide you through the steps of reviewing workplace activities, identifying potential and existing hazards, and learning relevant legislation by key sections. Choose from suggested control measures to create your final action plan that will help address the risks in your workplace.

All OSH Essentials content is developed and reviewed by CCOHS' team of technical specialists.

Individual Topics include:

- Excessive Noise
- Incorrect Lighting Levels
- Manual Materials Handling
- Manual Materials Handling: Seated Work
- Slips and Trips
- Working Alone
- Working in Hot Indoor Environments
- Working in Hot Outdoor Environments
- Working on Ladders
- Workplace Violence

...more topics to come!
